1. (Previously presented) A method, comprising:  
forming a sacrificial layer of material on a substrate;  
covering said sacrificial layer of material with a polymer material;  
removing said sacrificial layer to form a cantilevered polymer structure over a substrate using micromachining techniques;  
forming at least one structure between said polymer structure and said substrate which avoids said polymer structure sticking to said substrate after said removing;  
forming a plurality of leg portions, extending between an extending portion of said cantilevered polymer structure, and said substrate; and  
an additional etching to free said leg portions from said substrate.
